Hov Pod Hovercraft are designed for durability, safety, ease of use

CRUISE @ 8 INCHES, > 40 MPH, ANY FLAT SURFACE

Hov Pod Hovercraft are designed specifically for leisure and commercial use. Our design team focused on making hovercraft safe and easy to use, yet durable, and easy to support. CAD designed, CNC engineered.

Hov Pod SPX TCC Hovercraft are suitable for leisure or commercial applications. Manufactured from robust High Density Polyethylene, the SPX TCC range of Hov Pod Hovercraft are extremely strong and able to take the punishment that all-terrain hovercraft demand. We aspire to supply the best small hovercraft available in the world.

Our designers took a blank paper approach to hovercraft design; we reject engineering and safety standards deemed acceptable by other suppliers. We rejected glass fibre construction, Neoprene and Hypalon skirt materials, sub

standard engineering processes and materials. We do not supply hovercraft without essential rear fan guards, we do not up-rate or modify engines since doing so would invalidate engine supplier warranties. Our customers expect the best, that's what we aspire to deliver.

As Hov Pod Hovercraft have evolved since their introduction in 2002, HDPE hull construction, CAD/CNC production techniques and new engine developments have created a vehicle that will appeal to leisure and commercial users alike.

Many Applications

Hov Pod Hovercraft are used for rescue, commercial, survey and military patrol applications.

BEST HOVERCRAFT AVAILABLE

No other hovercraft matches Hov Pod

The latest Hov Pod SPX TCC 120 Turbo powered model utilizes the Weber 120 Horse Power 4 stroke engine that delivers superior lifting capacity to suit a wide range of commercial applications. Customers include the Red Cross, DRLG, United Nations World Food Program etc.

Hovercraft can play a vital role in emergency rescue situations, particularly during flooding emergencies, or for rescue from areas that place rescue operatives in considerable danger, i.e. mud, sand and ice rescue scenarios.

Hov Pod Hovercraft are also hard at work to assist in bridge construction, maintenance and repair. They also assist oil companies with oil exploration projects, especially in shallow water areas, as well as pipeline and power-line maintenance and patrol. Hov Pod Hovercraft can be put to a wide variety of different commercial uses, or used simply

to gain access to coastal or riverside properties. With no propeller to snag under-water obstructions, rocks, coral, manatees, the Hov Pod Hovercraft can solve a number of different access

problems. The Hov Pod SPX has been designed to be easy and safe to use. For further information, please visit our website:

On-water Payloads

The Hov Pod SPX TCC 65HP will lift up to 275 Kgs or 606 pounds from an on-water start, plus up to 50% more weight when starting from on land. The Hov Pod SPX TCC 120HP Turbo will lift up to 325 Kgs or 717 pounds from an on-water start, plus up to 50% more weight when starting from on land. Seats up to 4 people.

We ship to all destinations

Dimensions

Length 3.63 M, 11.9 Feet.

Width 1.86 M, 6.1 Feet.

Height 1.49 M, 4.89 Feet.

Safety Features

- Rugged HDPE hull
- Superb Buoyancy
- Rear Guard
- Anti - Plow Design
- Kill Cords
- Polyurethane / Nylon skirts
- Stainless steel marine parts
- Marine protected electrics
- Non modified engines
- Full manufacturer's warranty.
- Underside protection, shock pads and runners
- Quality - second to none.
